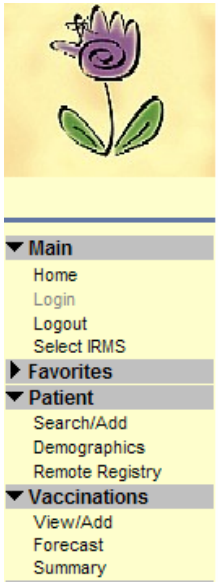
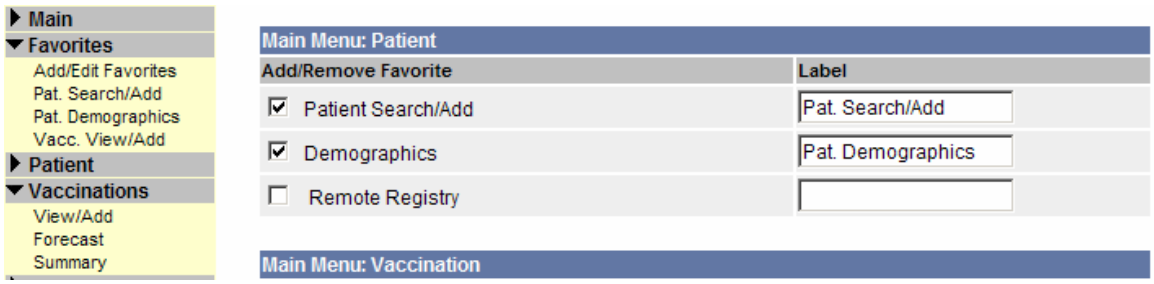
IRIS 3.0 Upgrade Changes
January 2006

Main Menu

1. **Collapsible Menu-** decreased the size of the left hand menu.



2. **"Favorites"**-allows users to add frequently used menu items to the top left hand menu and name them whatever they would like.



Patient Search Results:

3. "Report Duplicates" button – After a patient search, select report duplicates option, mark records to be reported and corrected by the IRIS Help Desk.

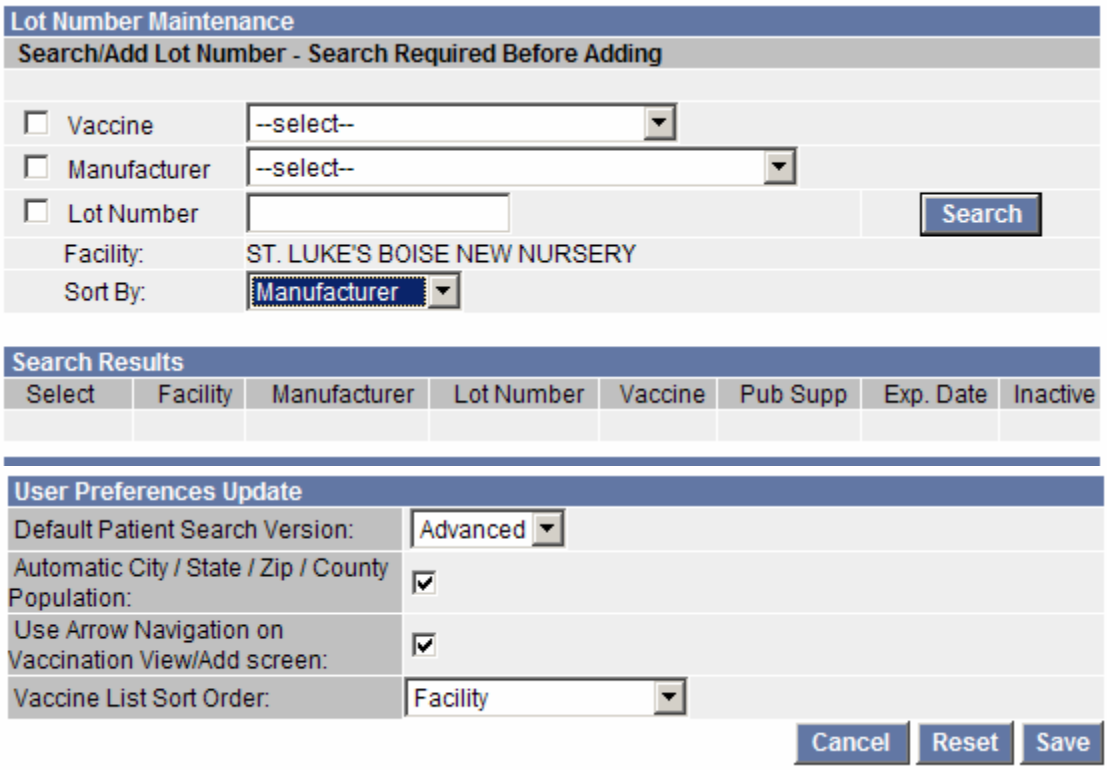
Lot Numbers/Vaccine Accountability

7. "Lot Numbers" – can be sorted by facility group, facility, expiration date, manufacturer, lot number (this can be done either in personal settings or on the lot number search/add screen)



IRIS Report for CASA

8. "Chickenpox History" – added the history of chickenpox to the CASA export file. New STC 3.0 Template is available in CASA. This will also be available in the new CoCASA (replacing CASA). Training on CoCASA will be scheduled in February.

ETC…..

9. "Back" buttons – a number of "Back" buttons were added throughout IRIS. The buttons will typically take the user to the search or menu screen the user was working in.
